

Team Reflection Sprint 1

Group 17

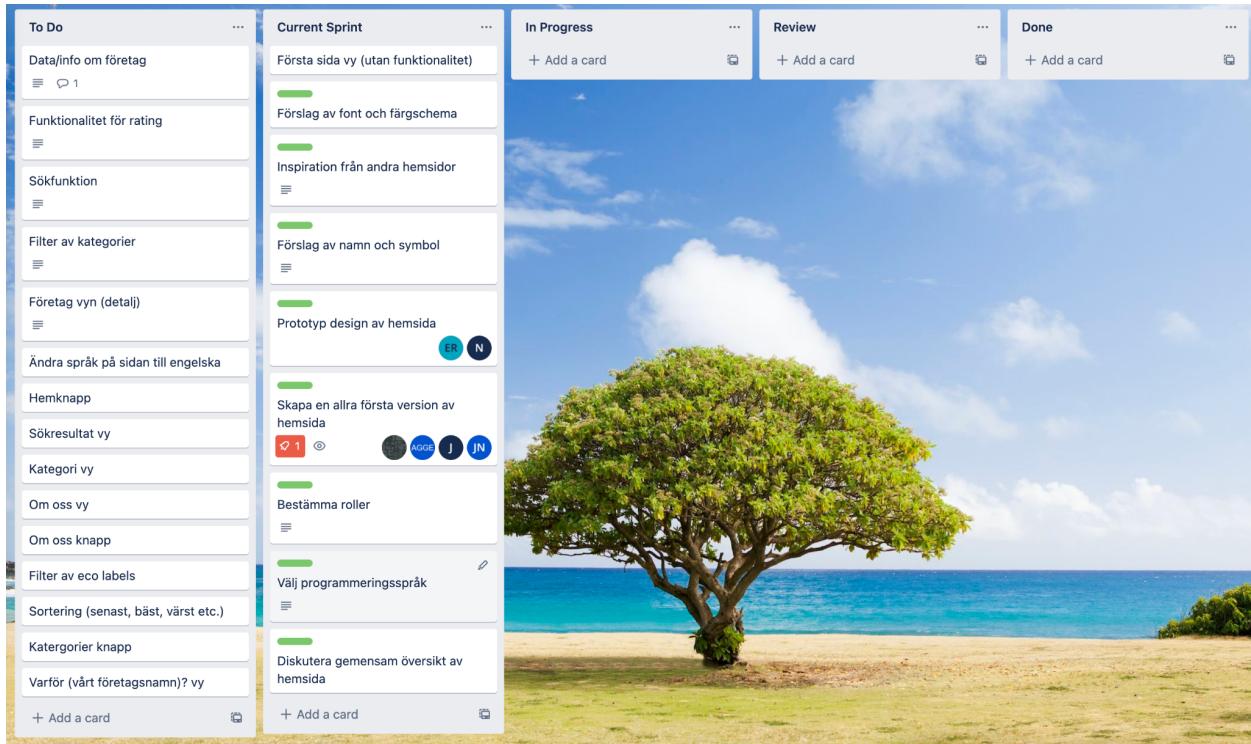

You shall reflect on the following aspects:

- How is your team doing? Does it work well? Can you improve?
 - We are starting to get used to and learn about how to work agile. We have established a clear plan for general roles and our schedule for each sprint.
 - This week worked out well, but we also had lower expectations for this week to give us room to focus on how to work in an agile team and get to know the tools we will use to build the website.
 - We have a platform for communicating which works well, but we need to improve in terms of confirming meetings and general decision making.
 - We have had some trouble to communicate what the todo's include and will try to make them more specific moving forward
 - We have created a healthy work environment in the group where everyone feels comfortable sharing their opinions and ideas, as well as asking the others for help whenever it is needed.
- How do you ensure that your software is of good quality? Any measures you have taken (e.g., pair programming, test procedures, code reviews etc?)
 - The team members will review the part of the website that they have not worked on.
- What user stories did you implement in this sprint?
 - First page view (without functionality)
 - Create a HTML file to be able to open in browser
 - Prototype 1 design of website
 - Suggestions for company names and logo
 - Suggestion of fonts and colors
 - Discuss an overall view in the team for the website
 - Choose programming language
 - Choose roles for team members
 - Gather inspiration from other websites
- What are your plans for the upcoming sprint?
 - We will communicate better regarding meetings and decision making to be more efficient.
 - The website should have basic functionality which includes the home page and one working button "compare companies" which leads to another page that

displays a list of companies. This page can evolve to be the category view page used when displaying different categories.

- The website should also include the company page with “fake information”.
- Decide on a logo and a name for the website.

Taskboard before the sprint:

Taskboard end of the sprint:

To Do

- + Add a card

Current Sprint

- + Add a card

In Progress

- + Add a card

Review

- + Add a card

Done

- Första sida vy (utan funktionalitet) (ADAM, AGGE, J, JN)
- Skapa en allra första version av hemsida (ER, N)
- Prototyp 1 design av hemsida (ER, N)
- Förslag av namn och symbol (ER, N)
- Förslag av font och färgschema (ER, N)
- Diskutera gemensam översikt av hemsida (ER, N)
- Välj programmeringsspråk (ER, N)
- Bestämma roller (ER, N)
- Inspiration från andra hemsidor (ER, N)
